OLYMPIA, WA – Principal of SEEC LLC and co-chair of the Northwest EcoBuilding Guild, Fiona Douglas-Hamilton, will be presenting at the International Association of Assessors (IAAO), West Puget Sound Chapter, for their Spring Conference on April 11th 2008.

Douglas-Hamilton's presentation is titled Green Value and will take participants through work begun on the inter-relationship of valuation and sustainability under the Vancouver Valuation Accord and how that influence is translating to the residential sector. She will cover the initial findings of the Green Building Value Initiative – a collaboration by the primary green building organizations and certification programs in the Cascadia region to examine the hypothesis of value for high performance commercial and green residential buildings.
